

Customer Checklist

The benefits of The Sunlight Advantage® are plentiful. Solar energy can help make the future bright and leave a legacy of clean energy and a healthier environment for future generations. **And solar can also save you money.** Many factors may affect your decision to install a solar system. These questions will help you determine if The Sunlight Advantage is right for you.

Does your home have a south facing roof to draw maximum capacity from the sun?

Ideally, ample roof space should face directly south, providing optimum exposure to sunlight throughout the year. Although a south facing roof is ideal, an east to west exposure may still qualify for The Sunlight Advantage but the amount of solar energy generated may be less.

Is your roof clear of trees or other structures that may block direct sunlight?

Shading of solar panels due to a building, utility pole, cloud or tree can have a negative impact on the performance of the solar panel system. Even the partial shading of one or two cells from a solar panel can reduce the output dramatically.

Is your roof five years old or less? If not, is there a minimum of 20 years remaining on its warranty?

It's best to evaluate the age and condition of your roof. Your roof should be no more than five years old so that the life of the lease coincides with the terms of the manufacturer's warranty.

Does your roof have approximately 300 sq. ft. of unobstructed space?

The roof must provide ample space to support The Sunlight Advantage system to maximize its potential and ensure proper maintenance of the system.

Do you anticipate replacing your roof within the next few months?

Installing The Sunlight Advantage system provides the opportunity for you to benefit from the full term of the 20-year lease.

Is the property free of any solar deed restrictions or systems?

Some property ordinances and deed restrictions may prohibit the installation of a solar system. Check with your homeowner's association or local building code enforcement agency to determine what restrictions may apply.

Do you have a credit score of at least 625?

A Fair Issac Credit (FICO) score of at least 625, sourced from Experian, is required to qualify.
